Work & Research Experience

Postdoctoral Researcher: Foundation Models & Multi-Modal Federated Learning for Precision Medicine and Liver Cancer Detection

- Developing advanced deep learning and foundation models integrating longitudinal MRI data, multi-omics profiles, and clinical variables for early detection and risk prediction of hepatocellular carcinoma (HCC).
- Building explainable AI (XAI) frameworks that link imaging features and molecular markers to clinically meaningful outcomes in precision oncology within the AI-HCC ZonMw project.

University of Twente / Medisch Spectrum
Twente

January 2026 - Current

Postdoctoral Researcher: Federated Learning in Healthcare & Real-World Evidence

- Scientific Coordinator of the Flanders AI Research Program Use Case Real World Evidence, leading multi-institutional research on privacy-preserving healthcare analytics. As Technical Machine Learning Lead of the Biomedical Data Sciences Group, developed federated learning frameworks enabling collaborative clinical research across Belgian healthcare institutions without sharing sensitive patient data.
- Research encompasses federated tensor regression for longitudinal health data, distributed learning architectures for heterogeneous clinical datasets, and translation of federated AI methods into practical healthcare applications.

UHasselt

January 2024 - January 2026 (Research Affiliate
from 2026)

Postdoctoral Researcher: Deep Learning & Tensor Regression for Sign Language Alphabet Decoding via Brain-Computer Interfaces

- Developed advanced machine learning methods for decoding sign language alphabet gestures from high-density intracranial brain activity (ECoG). Combined deep learning architectures with tensor regression models to capture complex spatiotemporal patterns in neural signals associated with linguistic motor control.
- Technical contributions included implementing block-term tensor decomposition for multi-dimensional neural data and exploring cross-subject generalization for robust BCI performance. The research advances both fundamental understanding of neural encoding of sign language and practical assistive communication technology. Conducted at the Laboratory for Neuro- and Psychophysiology under supervision of Prof. Marc Van Hulle, extending previous doctoral research in motor decoding to linguistic applications.

KU Leuven

May 2023 - January 2024

Data Science Consultant

- Provided consultancy for physical experiments using Synamps RT and Neuvo EEG Systems.
- Supported the data analysis for hybrid BCI with new analytical EEG modeling techniques & signal detection- and classification algorithms.
- Infer emotion from EEG signals using machine learning techniques.
- Usage of ECoG signals from semi-invasive recording for imagined movement detection and language processing.

Flanders BCI

2022 - 2024

Research Stay Idrogenet Srl, Gloreha: Robotic Rehabilitation

- Develop custom software for the control of the Gloreha robotic rehabilitation device,
- Specifically the R-TOUCH PRO Sinfonia, a custom-built robotic exoskeleton for hand rehabilitation.

Lumezzane, Italy

Dec. 2022 - Jan. 2023

PhD Researcher in Computational Neuroscience

- Cognitive and Molecular Neuroscience
- PhD Thesis: Finger Movement Decoding: From Source-Localisation to Tensor Regression Modelling

KU Leuven

Sep. 2018 - May 2023

Web Performance Research Internship

- I worked on the iMinds PRO-FLOW project @ Expertise centre for Digital Media (EDM)
- focus on the difference between the http versions (http1.1, https, http2).

UHasselt

Jul. 2016 - Sep. 2016

Summer Research Internship Physical Computing

- Interfacing between human entity, a drone and virtual objects @ Expertise centre for Digital Media (EDM).
- (C++, Optitrack motion capture, custom built drone)

UHasselt

Aug. 2015 - Sep. 2015

Teaching & Academic Activities

Bioinformatics (3740) Coordinating lecturer, UHasselt

Sept. 2025 - Sept. 2026

BKO (Basic Teaching Qualification) track - Teacher Professionalization, UHasselt

2025

Data Science in Healthcare (4747) Lecturer (teaching team member), UHasselt

Sept. 2025 - Dec. 2025

Advanced Topics in Data Science (4569 & 4585) Lecturer Federated Learning (teaching team member), UHasselt

June 2024 - Sept. 2025

Bioinformatics (3740) Coordinating lecturer, UHasselt

Sept. 2024 - Sept. 2025

Guest Associate Editor Use of Big Data and Artificial Intelligence in Multiple Sclerosis, Frontiers in Immunology

2024 - 2025

VLAIO Evaluator for BAEKELAND SPIN OFF MANDATES, VLAIO

2025

Student Research Competition Judge (International Conference on Functional Programming), ICFP

2024

Brain-Computer Interfacing (B-KUL-H08M0A) Guest Lecturer, KU Leuven

2022-2025

Educational background

Flemish Sign Language course

- Graduates are able to engage in day-to-day conversations with deaf and hard-of-hearing individuals.

Flemish Sign Language Centre

Sep. 2022 - May 2024

Doctoral Programme in Biomedical Science (PhD) in Computational Neuroscience

- Cognitive and Molecular Neuroscience
- PhD Thesis: Finger Movement Decoding: From Source-Localisation to Tensor Regression Modelling

KU Leuven

Sep. 2018 - May 2023

Advanced Master of Science in Engineering (M.Sc.) in Artificial Intelligence

- Engineering and Computer Science (76% - Cum Laude)
- Thesis: An Information Theoretical Approach to EEG Source-Reconstructed Connectivity (on Github)

KU Leuven

Sep. 2017 - Jul. 2019

Honours programme of the Faculty of Engineering Science (Research Track)

- Research Assistant: design of type-&-effect system for Eff based on row polymorphism
- Research Assistant: efficient compilation of algebraic effect handlers (in Eff)

KU Leuven
Sep. 2016 - Oct. 2018

Master of Science in Engineering (M.Sc.) in Computer Science (Burgerlijk Ingenieur - ir.)

- Artificial Intelligence & Theoretical Computer Science (76% - Cum Laude)
- Thesis: Algebraic Subtyping for Algebraic Effects and Handlers (on Github)

KU Leuven
Sep. 2016 - Sep. 2018

Business Summer School: United in Manchester (0739)

- International Business

The University of Manchester
Jul. 2015 - Aug. 2015

Bachelor of Science (B.Sc.) in Computer Science

- Physics and General courses (79% - Magna Cum Laude)
- Thesis: Machine learning techniques for flow-based network intrusion detection systems (on Github)

UHasselt
Sep. 2013 - Jul. 2016

Grants & (open-source) Projects

Use Case Real World Evidence - Flanders AI Research Program

- Role: Scientific coordinator (UHasselt) and AI Researcher
- Team: approx. 10 researchers across 4 institutions

Scientific Coordinator
2024 - Current

ELIXIR Belgium - Roadmap 2023-2025

- Role: Consortium partner (UHasselt), focusing on health data re-use and federated analyses
- Collaborations: KU Leuven (Yves Moreau), University of Antwerp (Geert Vandeweyer), VIB (Frederik Coppens)
- Context: ELIXIR Belgium is part of ELIXIR Europe, an ESFRI initiative funded by the European Commission and national agencies

Consortium Partner
2023 - 2025

Federated Learning Kit (FLkit)

- FLkit is designed to help life scientists apply federated learning in their research. It offers guidance, techniques, and tools for working with decentralized and sensitive data, enabling privacy-preserving collaboration and deeper insights without sharing raw data.
- The project is in its early stages and open to contributors. The long-term goal is to make FLkit community-driven, sustained, and governed by researchers and practitioners who want to advance federated learning for life sciences.

Contributor
2025 - Current

Cardinal: Educational and Research platform for MSc theses in PL/compilers

- Cardinal is a C++20 reimplementation of the Wren VM, designed for clarity, research, and education. It provides a small, well-documented virtual machine and runtime for exploring compilers, concurrency (fibers), and language embedding.
- The project serves as a platform for student theses and for prototyping new programming language ideas.

Lead Developer
Jan. 2015 - Current

Open Source Python Package - Block-Term Tensor Regression (BTTR)

- The open-source BTTR implementation provides researchers and practitioners with accessible, reproducible tools for tensor-based regression in neuroscience and related domains. It is actively developed and documented to support experimentation, education, and further research.

Lead Researcher & Developer
2022 - Current

Wisconsin Breast Cancer Dataset Research Tutorial for Federated Learning

- This repository serves as a step-by-step tutorial for running federated learning studies with the FL4E framework. Using the Wisconsin Breast Cancer dataset as an example, it guides researchers and students through the full workflow.
- Clear documentation and markdown guides explain each step, making it easier for newcomers to understand and apply federated learning in practice.

Research Tutorial Author
2025 - Current

ICAL parser for KU Leuven schedules

- A Node.js application to create an iCalendar file for courses at KU Leuven. (>1000 active users)

Lead Developer
Aug. 2016 - Current

Household Survival: Immersive Room-Sized Gaming Using Everyday Objects as Weapons (Unity, Optitrack Motion Capture)

- Developed a room-scale AR game using everyday objects as controllers (broom, fan, vacuum, mousetrap).
- Demonstrated immersive physical-virtual interactions.
- Still used in university courses as a teaching example.

Researcher
Sep. 2015 - Dec. 2015

Honors & Awards

Jun. 2025 **Selected for EFSA Framework Contract**, European Food Safety Authority

Jan. 2018 **FWO Fundamental Research Grant**, FWO

Mar. 2018 **Finalist**, Cyber Security Challenge 2018

Sep. 2017 **3rd place**, ICFP 2017 Student Research Competition

Jul. 2016 **Bachelor Award**, in Computer Science

May. 2016 **3rd place**, ACM CHI 2016 Student Design Competition

Feb. 2016 **2nd place**, BeGDC (Belgian Game Development Championship)

Jan. 2016 **IELTS**, Academic Module (8.0/9.0)

Europe

Oxford, UK
UHasselt, Belgium
San Jose, CA, USA
Brussels, Belgium
Brussels, Belgium

Professional Development Activities

Twente Health School (summer school), University of Twente , Interdisciplinary health-research summer school at the University of Twente.	2026
Mathematics & Natural Sciences Tutor, Freelance , Supporting high school and university students in mastering mathematics (and other natural sciences) through personalized tutoring	Sept. 2015 - 2024
Coach, DjangoGirls , Inspire women to fall in love with programming (Python, Django workshops)	Mar. 2018 - 2024
Coach, CoderDojo (UHasselt, PXL) , Teach children programming (Scratch, Python, Minecraft and Lego mindstorm).	Sep. 2014 - 2025
Student Representative, KU Leuven , POC (Education Committee) of Master Computer Science Engineering, POC (Education Committee) of Advanced Master Artificial Intelligence, Member of Departmental council of Computer Science, Department board of Computer Science and Faculty council of Engineering Science	Sep. 2017 - Sep. 2018
Student Council Member, StuRa UHasselt , Member of Board of Education, Faculty Council. Board of Student Facilities, Diversity Commission, Temporary representative in VVS (Flemish Union of Students)	Mar. 2015 - Aug. 2016
Student Representative, UHasselt , Representing students interests in a Computer Science education context. Representing Computer Science education for high school students	Sep. 2013 - Jul. 2016
